SUMMARY

Experienced Senior Software Engineer with deep expertise in Node.js, React.js, TypeScript, and microservices architecture, specializing in building scalable, enterprise-level applications. Proven ability in designing efficient backend design, integrating third-party services, and deploying robust solutions on cloud platforms. Skilled at delivering high-performance applications that align with business objectives

SKILLS

- **Programming:** JavaScript, TypeScript, Python
- **Backend:** Node.js, Express.js, Nest.js, Jest
- **Frontend:** React.js, Next.js, MUI, Redux Toolkit, HTML, CSS, Tailwind, React Testing Library, Playwright
- **Databases:** MongoDB, PostgreSQL, Redis
- **Artificial Intelligence:** RAG, LangChain, Prompt Engineering, LLM APIs (OpenAI, Claude), Vector DB
- **Tools & Technologies:** TypeORM, Git, Docker, Socket.io, Kafka, AWS EC2, NGINX, RAG, Claude Code

WORK EXPERIENCE

Senior Software Engineer, Floes

Mar 2026 - Present

- Leading end-to-end development of the Audit Management module using React, MUI, and Redux Toolkit, driving UX decisions in direct collaboration with stakeholders.
- Owning the document management and e-signature workflows, integrating Docuseal for seamless scheduling and contract execution.
- Driving product roadmap execution with feature flag strategies via PostHog, enabling controlled rollouts and A/B experimentation.

Software Engineer, IOPSHub (Floes)

Feb 2024 - Feb 2026

- Engineered the backend foundation of a multi-tenant HRMS SaaS product using Node.js, Express, and TypeScript, serving as the primary contractor for Floes.
- Architected a microservices-based system with Docker, enabling independent service deployments and horizontal scalability.
- Built secure REST APIs using InversifyJS with fine-grained RBAC authorization, ensuring strict access control across tenant boundaries.
- Established observability infrastructure with Winston logging and GlitchTip error tracking, improving incident response in an agile environment.

Full Stack Developer, Designoweb Technologies

Sep 2023 - Jan 2024

- Led backend development using Express.js and PostgreSQL with TypeORM for a mental health organization's website and CRM.
- Deployed both frontend and backend on AWS EC2 with an NGINX server, ensuring optimal performance and scalability.
- Developed a salon management panel using React, Node.js, and Express for a Polish client.
- Integrated Mapbox APIs to enhance navigation and mapping features in a web application.

Systems Engineer, Infosys Ltd.

Mar 2022 - Sep 2023

- Designed and developed enterprise applications for Mercedes-Benz using Node.js, Express, PostgreSQL, and React.js.
- Created efficient APIs to present data in a tabular format, enhancing user accessibility and engagement.
- Participated in a 3-month intensive training program on the MERN stack, gaining comprehensive knowledge and hands-on experience.

EDUCATION

2016 - 2020

JSS Academy of Technical Education, Noida

B. Tech. - Electrical Engineering
